

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): ~~Glazing~~ A glazing assembly, comprising in succession:

- a first rigid substrate (S1);
 - a second rigid substrate (S2);
 - at least one active system (3) comprising a multilayer, comprising at least one thin film and placed between the substrates (S1 and S2); and
 - at least one polymer film (f1) ~~having~~ comprising the function of retaining fragments of the glazing assembly should ~~[[it]]~~ the glazing assembly break, the said at least one polymer film being placed between the substrate (S1) and the substrate (S2);
- ~~characterized in that~~ wherein the active system (3) is on the inner face (2) of the substrate (S1).

Claim 2 (Currently Amended): ~~Glazing~~ The glazing assembly according to Claim 1, ~~characterized in that~~ wherein the ~~[[is]]~~ active system ~~[[is]]~~ comprises an electrically controllable system ~~having~~ comprising variable optical properties, and/or variable energy properties, or a combination thereof, [[of]] wherein the electrically controllable system is at least one system selected from the group consisting of an [[the]] electrochromic system, an optical valve, a viologen-based system, a liquid-crystal system, [[or]] and an electroluminescent system type.

Claim 3 (Currently Amended): ~~Glazing~~ The glazing assembly according to Claim 1, ~~characterized in that~~ wherein the active system ~~[[is]]~~ comprises a thin film or a thin-film multilayer with a thermal function, of the low-emissivity or solar-protection type, an acoustic

function, of the acoustic attenuation coating type, or an optical function, of the decorative or absorbent, thermochromic or thermotropic type.

Claim 4 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1 ~~one of the preceding claims, characterized in that~~ wherein the substrates (S1) and (S2) are made of glass.

Claim 5 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1 ~~one of the preceding claims, characterized in that~~ wherein the total thickness (e_{1+2}) of the substrates (S1) and (S2) and of all the materials ~~that can be~~ placed between them is less than or equal to 8 mm, ~~especially less than or equal to 5.5 mm, preferably between 2 mm and 5 mm.~~

Claim 6 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~one of Claims 1 to 4~~ claim 1, ~~characterized in that~~ wherein the total thickness (e_{1+2}) of the substrates (S1) and (S2) and of all the materials ~~that can be~~ placed between them is less than or equal to 30 mm, ~~preferably between 6 mm and 25 mm.~~

Claim 7 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~one of the preceding claims~~ claim 1, ~~characterized in that~~ wherein the substrates (S1) and (S2) have substantially identical shapes and substantially identical dimensions.

Claim 8 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~one of~~
~~Claims 1 to 6~~ claim 1, characterized in that wherein the substrates (S1) and (S2) have
different dimensions and substantially identical shapes.

Claim 9 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1
~~one of the preceding claims, characterized in that it~~ wherein the glazing assembly further
comprises ~~is provided with~~ an opacifying peripheral coating, wherein the opacifying
peripheral coating is of the screen-printed type, and wherein the opacifying peripheral coating
is applied to at least one part of the glazing assembly selected from the group consisting of
especially around the periphery of face (2) on the substrate (S1), and/or around the periphery
of face (3) on the substrate (S2), and around the periphery of ~~[[or]]~~ face (4) on the substrate
(S2), ~~especially at enamelled areas or at electroconductive areas.~~

Claim 10 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~one of~~
~~the preceding claims~~ claim 1, characterized in that ~~it is provided with~~ wherein the glazing
assembly further comprises at least one margining line is positioned on the periphery of the
face (2) located on the substrate (S1), ~~and/or~~ on the periphery of the face (3) located on the
substrate (S2), or a combination thereof.

Claim 11 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1
~~one of the preceding claims, characterized in that it is provided with~~ wherein the glazing
assembly further comprises ~~at least~~ a first peripheral seal in contact with the facing faces of
the substrates.

Claim 12 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 11 ~~one of the preceding claims, characterized in that it is provided with~~ wherein the glazing assembly further comprises ~~at least~~ a second peripheral seal in contact with the edges of the substrates.

Claim 13 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~either of Claims 11 and 12~~ claim 12, characterized in that wherein the first ~~and/or~~ and second peripheral seal(s) ~~is (are) attached or~~ seals are obtained formed by extrusion or ~~obtained by~~ encapsulation.

Claim 14 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 12 ~~either of Claims 12 and 13, characterized in that~~ wherein the second peripheral seal, ~~or at least one of them if there are more than one,~~ is flush with the outer face of the first substrate.

Claim 15 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 12 ~~one of Claims 10 to 14, characterized in that~~ wherein the first ~~and/or second~~ peripheral seal, the second peripheral seal, or the first and the second peripheral seal ~~or at least one of them if there are more than two seals,~~ at least partly ~~fills~~ fill an open peripheral groove defined by a recess between the two substrates.

Claim 16 (Currently Amended): ~~Glazing~~ The glazing assembly according to ~~one of Claims 10 to 15~~ claim 12, characterized in that wherein the first peripheral seal, the second peripheral seal, or the first and second peripheral seals are ~~and/or second peripheral seal is~~

penetrated by connection elements of the active system, ~~and/or~~ at least partly comprise
~~contains~~ mechanical reinforcement elements, or a combination thereof.

Claim 17 (Currently Amended): A method of forming an article comprising,
forming the article with the glazing assembly of claim 1; wherein the article is
selected from the group consisting of a window, a sunroof, a skylight, a display panel, a
display case, and a piece of furniture ~~Glazing assembly according to one of the preceding~~
~~claims, characterized in that it is a window for the motor vehicle industry, especially a~~
~~sunroof, or a window for buildings, especially a roof window or skylight.~~

Claim 18 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1
~~one of the preceding claims, characterized in that it~~ wherein the glazing assembly passes the
safety tests of the ECE R43 and ANSI Z26.1. standards.

Claims 19-20 (Canceled).

Claim 21 (Currently Amended): ~~Glazing~~ The glazing assembly according to one of
~~the preceding claims claim 1, characterized in that it~~ wherein the glazing assembly comprises
at least one transparent substrate of polygonal shape, wherein the at least one transparent
substrate comprises at least one property selected from the group consisting of flat, or curved,
partially curved, clear, or and bulk-tinted substrate of polygonal shape or at least partly
curved.

Claim 22 (Currently Amended): ~~Glazing~~ The glazing assembly according to claim 1
~~one of the preceding claims, characterized in that it includes~~ wherein the glazing assembly
comprises an opaque, opacified or mirror substrate.

Claim 23 (Canceled).
